HONGKONG, TUESDAY, JUNE 30, 1868.

THE increase of steam communication with the Far East is reaching a development undreamt of even by the first projectors of the fortnightly mails. It was but a few days since that we recorded the establishment of a direct line between Australia and Japan-"the Eastern Empress of the future," as many think and the present mail brings us news of the establishment of additional facilitie from two quarters, France and England. The Messageries Imperiales intend with-A N EXTRA ORIMINAL SESSIONS in a few months, it is said, to run fort A of the Supreme Court, will be held on nightly steamers in lieu of the monthly service now performed, while from the Straits Times we learn that there is a well-founded report that an enterprising Firm in London, intend running a monthly line of steamers between that port, Singapore, China and Japan. "The pioneer vessel of the line, named the Nile, was despatched from London on the 7th May, and the second steamer,called the Nymph, was to leave on the 7th June." Whatever may be the prevailing opinion regarding the falling off of trade in China-founded as we have often said upon the fact that the "great" houses are being rapidly substituted by a number of traders of more modest means and less extensive transactions-it is pretty evident that but little fear is felt in Europe as to its future development. "Carriage makes traffic " is a truism which has been exemplified in the railway system, and will, we doubt not, be equally fulfilled as regards steamers. We wish the new candidates for public favor every success. convinced that nothing tends more than extensive facilities in this way to the eventual "opening up" of the halfsealed empires of the East.

A notification appears in the North for foreign Affairs, that a Notification, given under my seal on the 14th day of June, 1867, providing for the infliction of certain Penalties for violations of Treaty in cases where no specific penalty is stipulated for in such treaty, has been disapproved by the Queen, the same is hereby publicly notified, and the said notification of the 14th of June declared to be no longer in force, in accordance Per "YESSO," on Thursday, the 2nd with the 85th Section of the Queen's Order in Council of 1865." A-CORRESPONDENT of the Singapore Free Press writes as follows:—Of course you: have heard about the accident on board the Clan Alpine, on her way from Calcutta hitherward. It was a shocking affair, which the Penang Gazette rightly says should be inquired into. What the Singapore people think I cannot of course say, but they must be somewhat altered if they do not coincide with the Penangites that an inquiry is call- burden of proof lay on the defendant, that ed for. Speaking of Engineers it is strange that no measures are taken here or at Singapore to prevent incompetent men being placed in charge of the lives and property on board of steam vessels. True, an attempt is sometimes made in this way, but favoritism is generally the motive. How can any such attempt be effectual when it is said, and complained of by passed men, that the engineers of government vessels have no certificates of competency? At home the law compels an examination of all engineers as well as of masters and mates. Such an examination is more imperatively required in the case of the former.

OUR Canton, Correspondent writes as follows :- The weather in the early part of the morning of Wednesday last, which was the day for the Dragon boats to put in their annual appearance on the Pearl river, was rather unpropitious with rain and wind but the quantity of fire-crackers which was burned and the din of gongs, seem to have had the effect of moving the compassionate "Joss" to yield to the supplications of the there again. Celestials for a pleasant day. Nevertheless the wise Dragons vaticinated that it will not be a'l serone with them at this anniversary of their appearance, consequently they did not like the idea of defying the ele ments, hence the Dragons were few number, and of this few one succumbed. not, however, to the flery of the elements. but to the effects of the paddle-wheels of their more powerful senior the "Flying Dragon," which happened to pass down the river in her usual majestic style, and although not going at the rate of fifteen miles per hour, yet a paddling-dragon found i impossible not to get swamped. This accident occurred opposite to new Shameen, by. which thirty-two individuals, natives of place called Pok-ve-chun distant about o miles from Canton, have been drowned whose bodies, with the exception of five of them, are said to have been picked up. After this sad event took place the boatwomen were very cliary in approaching the spot where it occurred, for fear of its being infested with devils. It is lestials that our dashing friend of the "Flying Dragon," will be tormented by the ghosts of those who were drowned. The festival of Dragon-boats comes, however, ! once in a year ; but we have the daily sight and sometimes capsizing when our river steamers come up or go down at full speed. It will be perhaps after some such accident place, or a chop of ten goes down to the away from the wharf, by slowing down between Matow and Macao passage-a notification to which effect was issued from the British Consulate to the masters of to remain as a dead-letter in its archives f

The compradore of the German house is at last safe in the bosom of his family. The brigands are said to have ultimately reduced their demand to \$3,000, and evinced great earnestness to square up the adventure one way or the other, consequently the mainan's friends had to submit to the ultimatum. Thus the thundering despatches of the Prussian authorities, like the firing from pop-guns, have produced no effect; and the Celestials have it that, had it not been for those despatches, the brigands would have been more moderate in their demand, for they knowing the weakness of their own authorities, empty threats cannot be reput-

CHINA AND JAPAN. MONTHLY MEDIUM OF INTER-COMMUNICATION

Professional and Literary Men, Missionaries and Residents in the East generally. EDITED BY N. B. DENNYS.

PRICE \$6 PER ANNUM.

(Fouchow Advertiser, May 4, 1867.) We have received a copy of "Notes and Queries:" this publication will be really useful, it contains much matter relating to China which otherwise would be lost, and we wish it every success. Sinologues, Chinese antiquaries and scientific men ought especially to congratulate themselves on the appearance of "Notes and Queries,' as it will form their medium of communication and bring into notice what otherwise might bayelain unknown and buried in themselves. Now that Law and Officialism have got their Gazette, Science and Philology their Notes and Queries, and Missionaries their Recorder, the various divisions of mental thought and work in this land ought to be well taken care of ; for our part we are glad to see these several issues, both on account of the information and instruction they afford, and the index they supply to the mental vigour of the loreign community in

(Foochow Missionary Recorder, April, 1867.) The two first numbers of Notes & Querice on China and Japan have been placed on our table. The magazine is every way creditable to its editor and publishers, and we cannot but wish them the utmost success in their efforts to fill an important and hitherto noccupied place in Eastern liter-

(Singapore Free Bres Mar. 2, 1867.) We have received the first number of a neat little pumphlet of eight pages entitled " Notes and Queries on China and Japan," containing some able and interesting historical papers on China, together with notes and numerous queries for future contributors to answer, and states that the number of its pages will depend upon the number and length of its contributions. The work will be received with eagerness by literary men, as throwing light upon the ancient traditions of China, with researches into the laws of the various provinces, and the custom of the people. San Francisco News Letter, Mar. 23, 1867. We have received the first number, which is full of curious, out-of-the-way, and inte-

esting matter. (Shanghai Recorder, May 17, 1867.) We are put in possession of the fourth number of "Notes and Queries on China and Japan." In saying that the present number equals in interest and importance its predecessors, we have already said. great deal in its layour. Our knowledge of these countries has hitherto been so scattered, so ill-arranged, entombed as it were, in a series of works, in different lenguages, and spreading in point of time, over the last two centuries, that some means of separating what is really now, from what has possibly been over and over again described is much to be desired * * * As a medium of intercommunication on these and many other subjects of interest If required, protection will be granted on | to those connected with the far East, we must bail the appearance of "Notes and Queries." * * * We need only add that For Rates of Premiums, forms of pro- the periodical is of convenient size, is carefully edited by Mr N. B. Dennys, and is published at the low price of \$4 per annum; and having said this, we trust that " Notes and Quories on China and Japan" will meet with that success which so creditable a production deserves at the hands of those interested in Asiatic researches.

Report of North China Branch of the Royal Asiatic Society.

Two periodicals which are likely to be of great service have also been commenced one is published at Foochow and is called "The Missionary Recorder," and the other emanates from Hongkong and is called "Notes & Queries." It is intended to serve as a medium of intercommunication for persons interested in Chinese Philology, Geography or History. These indications of literary activity are perhaps the most import. ant "sign of the times" . has been our province to record, for they are all means to facilitate that mutual understanding one of the other, which seems so hard to establish between Europe and Chins.

(Hankow Times, Mar. 1867.) We insert this week, apropos of some piquant correspondence which has appeared of the late in our columns, an extract from the new publication, " Notes and Queries on China and Japan," on the subject of infanticide, which we particularly recommend to the notice of our contributors as containing some reliable facts in connection with the vexed question. * * * Such a work as the "Notes" is beculiarly adapted for bringing to light valuable information in respect to this country, and its people, language, and in-stitutions; and we trust it will be as warm ly supported as it deserves by the nume rous rising and energetic men, who are now thanks principally to the philological la bours of Mr Secretary Wade, making rapid advance in the acquirement of the languages to say nothing of the devoted missionaries who have already grown grey in their service to the cause to which they have given themselves.

The last section of the same chapter, on "Movements in Bullion," has been prepared and furnished for the Guide by Patrick R. "The Appendix of Sailing Directions has been reprinted from the China Pilot." With short interruptions, the coasts from Singapore to Hakodadi are all described in it; and for the Chinese coasts, the Directions have been improved by the insertion of the Chinese characters for the names of all places that could be ascertained."
